

Who are we?

Risk Mentor Digital Engines is a New Zealand business-improvement consultancy and software development company. We have decades of real-world experience and a track record of delivering outstanding results for our clients both in New Zealand and internationally.

Our experienced consultants and highly skilled technical team support clients to fully realise their digital futures.

Our industry leading approaches analyse, link, align and automate complex data and component relationships, so they become the foundation for simple, effective and logical work processes.

At Risk Mentor Digital Engines, we assist clients to deliver safe, productive outcomes through consistent and improved work processes.

In a dynamic environment where one size does not fit all, we take the time to understand your business processes, your data and your needs. We work with you to develop a digital business ecosystem that connects your people with your operational processes.

Real outcomes, measurable results

We work with clients to deliver step-change improvements in:

- ✓ Operational performance
- ✓ Critical risk management
- ✓ Governance and due diligence
- ✓ Information capture and reporting
- ✓ Data-based decision-making
- ✓ Operational process redesign

WE BUILD DIGITAL ENGINES

Connect people and processes • Transform data to information • Power up your future

Risk Mentor Digital Engines

Apply engineering logic to validate, digitise and operationally integrate your work processes

Unlock and share good practice, operational know-how and experience from across your business

Build the infrastructure that connects your people directly with your business systems

Transform data flows into information that supports decision makers at all levels

BUILD AND POWER YOUR DIGITAL FUTURE

What becomes possible when:

- In the field decision makers have access to the right information?
- 'As it happens' data is collected as each task step is executed?
- Your workforce is fully engaged and provides you with constant feedback on how things are really working?
- Company systems and processes are de-cluttered, streamlined and fully integrated with how work is done?
- Work as digitised = work as done = work as documented?

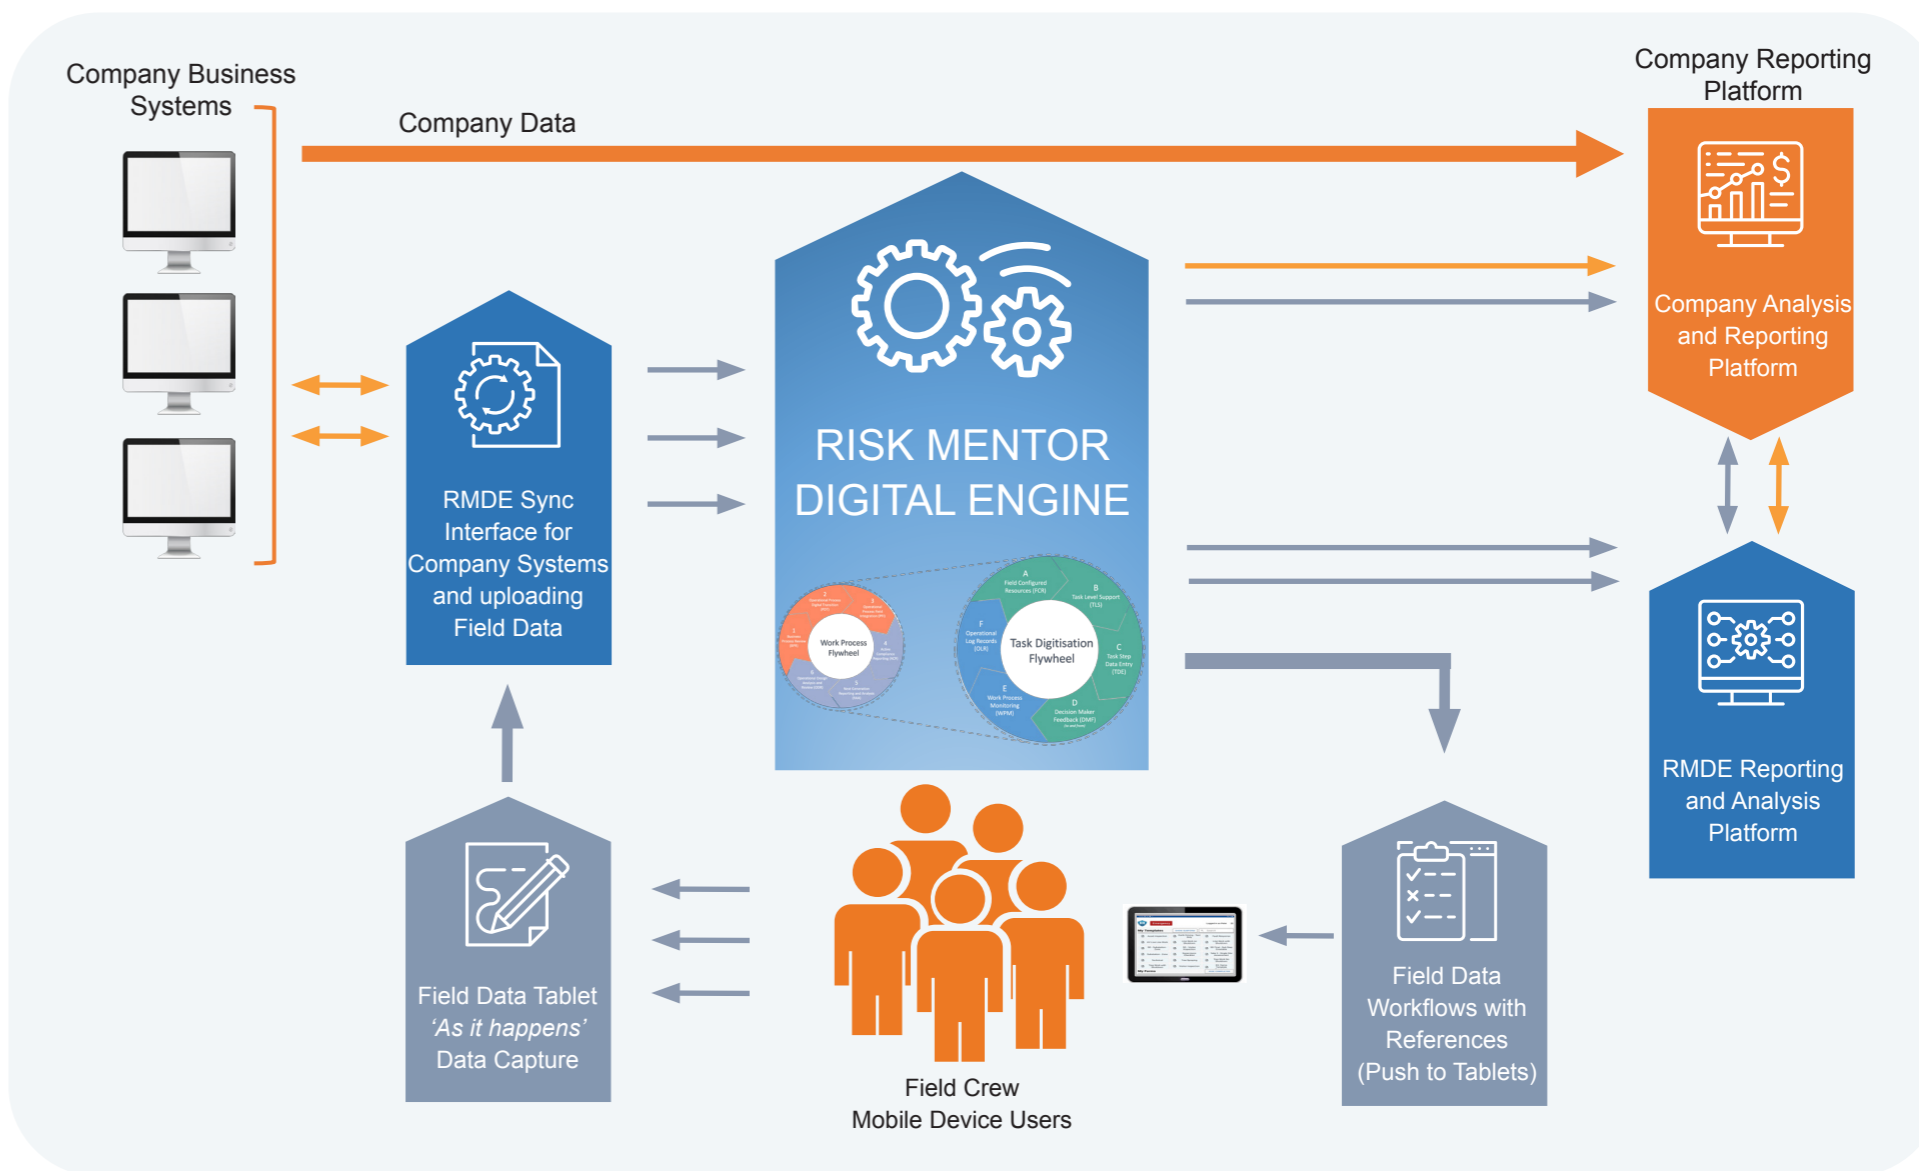

Our clients use Risk Mentor Products and Services to build and power their digital futures by:

- Working directly with front line staff to co-design and configure operational workflows
- Providing task step information and references within operational workflows
- Mapping, logging and updating the details of daily operational activities
- Capturing information-rich data and real-time reporting that supports decision makers at all levels
- Detecting and correcting early drift
- Establishing and maintaining agreed points of truth at a systems level
- Identifying work processes that require review and updating
- Supporting continual operational improvements based on analysis and data
- Delivering the business mission while efficiently meeting all compliance outcomes

'Using Risk Mentor products and services has introduced an ongoing digital discipline that has streamlined, de-cluttered and connected our company processes. This work is challenging but the investment has unlocked, and is sustaining, multiple business benefits.'

Senior Manager comment at industry conference in 2019.
